Project Alignment Overview

- The Project connecting Dharamshala city with the hill station of Mc Leodganj
- 40 years concession with TRIL Urban Transport Pvt. Ltd. (Tata group) owning 74% of the shareholding

The city of Dharamshala and McLeodganj receive ~ 1.2 million tourists annually

Salient features

- The ropeway has been awarded in Public private partnership (PPP) mode for 40 years incl. construction period
- The developer company, Dharamshala Ropeway Limited, which has designed & constructed the ropeway shall operate it for the balance Concession period
- Dharamshala is an important city in Himachal Pradesh being the winter capital of the state & administration hub of Kangra district; It is well connected by road & air to many important cities incl. metros.
- Likewise, McLeodGanj rose to prominence as it is the seat of His Holiness The Dalai Lama; In recent times, it has become popular due to celebrity visits & film shootings in the vicinity
- The entire area is known for its scenic beauty with the Majestic snow clad peaks of the Dhauladhars, lush pine & Cedar forests & Himalayan rivers;
- In the winters, the area around McLeodGanj transforms into a white wonderland with tourists making a beeline to enjoy the snowfall
- The ropeway is expected to drastically reduce journey time between the two places from present 25 minutes to upto 5 minutes; Infact on weekends the time to travel goes up to almost 45 minutes
- The Food scene is packed with a punch with options for one & all - Kangri Dham which is a traditional himachali thali is a must try along with Tibetan Momos & thukpa in small eateries in McLeodGanj

Customer experience

- The Ropeway system (inlc. Stations) has been designed with the philosophy of “Think like the customer”
- The Company has invested considerable resources to provide best in class customer experience to the Users (Locals & tourists)
- The European CEN standard has been imported from one of the tope 3 ropeway suppliers in the world; The technology is called the monocable detachable gondola system which is a revolutionary technology that ensures seamless experience during boarding/deboarding & the entire journey
- The Gondolas have been painted with colours that resonate with local themes (red, orange & green) & the seating is comfortable for a capacity of 8 people per gondola; Users can also carry luggage with them - People arriving in Dharamshala can store their luggage in the station cloak rooms or head straight to their destinations
- Each station has been carefully designed with top end amenities including contactless restrooms, comfortable waiting areas, drinking water counters etc.
- The stations would also provide recreation areas with multiple options for shopping & F&B.
- The external façade designs blend well with the surrounding mileu- the lower terminal is designed with Himachali architectural elements & the tope station has Tibetan elements
- There are multiple ticketing options incl. remote, counter etc. & tickets are QR code enabled

- Mr. Alok Kapoor, CEO TRIL Urban Transport Private Limited, which has promoted the ropeway company said that the Dharmshala skyway project is compliant with the stringent European CEN standards in terms of safety & reliability & that it shall greatly reduce the travel time & dependence on fossil fuel in this eco sensitive zone.
- Ms. Neha Pandit, Director, Dharamshala Ropeway Limited said, “the Project has been designed with the philosophy of “Think like the customer” and shall provide best in class experience to users. Besides the state of the art ropeway, each of the two stations have been designed to provide a varied experience including shopping and recreation. She added that considerable care has been taken to provide top end amenities like contact free restrooms & clean drinking water for user safety & hygiene.”
